Job Description

Flux Energy Systems is hiring a **Civil Engineer** to support our portfolio of EV Charging, microgrid and battery storage projects. This is the perfect opportunity for an engineer with 5-10 years of experience to work with a variety of exciting new technologies. You will help us develop a portfolio of Battery Energy Storage projects by defining design best practices and providing technical input to the permitting process.

This position is based in Marina del Rey, CA, and you will report to the president.

Working at Flux requires the ability to work independently and an eagerness to learn about the alternative energy industry. Our clients move at a fast pace, so we do too. We work hard and efficiently and constantly seek improvements for us and our clients. Flux is a small but growing team, so there are plenty of opportunities for learning and career growth!

**Required Skills and Experience:**

- Deep knowledge of cost-effective civil design for projects <0.5 to 2 acres
- Proven experience with Entitlements, Conditional Use Permits and CEQA
- Experience running RFPs for geotechnical field testing, survey and title
- Previous design experience in the distributed energy industry
- Eager to collaborate and help grow a nimble engineering team
- History of reviewing drawings, red lining and driving a team of drafters
- Attention to detail and strong time management skills

**Preferred Skills**

- AutoCAD
- Knowledge of ADA compliance and parking lot design
- Professional Engineering License in Civil Engineering
- What other skills can you bring to the team?

**To Apply:** Please submit a resume and a customized cover letter to contact@fluxenergysystems.com.

**About Flux Energy Systems**

Flux Energy Systems is an engineering and technical consulting company that assists developers and product innovators with solar, battery, and electric vehicle projects. Our expertise in implementation allows us to tackle exciting projects with new technologies and aggressive schedules. By collaborating with our clients, we provide the leadership and organization that drives projects to their schedule, budget and quality targets.
Working at Flux Energy Systems will get you involved in some of the most innovative solar, battery storage and microgrid projects in the country. Our client’s ideas are changing the world, and we get to help do it!
